

***Objective:
Improve Water Supply Reliability***

- ◆ Meet demands
- ◆ Maximize water use efficiency
- ◆ Minimize vulnerability
- ◆ Maximize control within the region
- ◆ Preserve highest quality supplies for potable use
- ◆ Protect against overdraft
- ◆ Provide for groundwater recharge
- ◆ Increase opportunities for recycled water use

Bay Area IRWMP

***Objective: Protect and Improve
Hydrologic Function***

- ◆ Maintain or improve in-stream flow conditions
- ◆ Control erosion and manage sedimentation
- ◆ Protect and rehabilitate natural processes
- ◆ Improve floodplain connectivity

Bay Area IRWMP

Objective:
Protect and Improve Water Quality

- ◆ Minimize NPS pollution
- ◆ Manage salinity
- ◆ Reduce mass loading of pollutants to surface waters
- ◆ Minimize taste and odor problems
- ◆ Minimize total dissolved solids
- ◆ Use stream buffers and floodplains to improve filtration of pollutants
- ◆ Maintain health of upland vegetation and land cover to reduce runoff quantity and improve quality

Bay Area IRWMP

Objective:
Protect Public Health & Property

- ◆ Minimize disinfection byproducts
- ◆ Minimize variability for treatment
- ◆ Advance technology through feasibility studies/demonstrations
- ◆ Protect public health and safety from flooding

Bay Area IRWMP

Objective:
***Protect and Enhance Environmental
Resources and Habitat***

- ◆ Conserve and restore habitat for species protection
 - Acquire, protect and/or restore wetlands, streams and riparian areas
 - Enhance wildlife populations and biodiversity
 - Provide lifecycle support (shelter, reproduction, feeding)
 - Protect and recover steelhead and other fisheries
 - Protect wildlife movement and corridors
 - Recover at-risk native and special status species

Bay Area IRWMP

Objective:
***Protect and Enhance Environmental
Resources and Habitat***

- ◆ Provide net benefits to environment
- ◆ Preserve open space and watershed lands
- ◆ Manage pests and invasive species
- ◆ Improve riparian and channel structure

Bay Area IRWMP

Objective:
Promote Economic, Social and Environmental Sustainability

- ◆ Minimize net impacts to environment
- ◆ Maintain economic sustainability
- ◆ Maximize external support
- ◆ Maximize ability to obtain outside funding
- ◆ Maximize internal consistency with agency plans and baselines
- ◆ Use renewable energy sources where available
- ◆ Minimize solid waste generation/maximize reuse

Bay Area IRWMP

Objective:
Promote Economic, Social and Environmental Sustainability

- ◆ Minimize total costs
- ◆ Allocate costs according to benefit
- ◆ Provide trails and recreation opportunities
- ◆ Protect cultural resources
- ◆ Increase community outreach and education for watershed health
- ◆ Increase social investment and stewardship

Bay Area IRWMP
